

DELHI PUBLIC SCHOOL, GBN

“The greatest threat to our planet is that someone else will save it”

– Robert Swan

THIS NEWS LETTER APPRISES YOU OF THE ONGOING EVENTS OF THE SCHOOL IN THE MONTH OF JULY-2016.

THE MISSION STATEMENT FOR DPS, GBN...

To create lifelong learners, independent, confident, resilient, empathetic and enlightened global citizens, capable of ushering in a better social order.

CBSE- GO GREEN ACTIVITY

In order to teach the children the importance of preserving, conserving and saving our earth, CBSE planned to organize an activity for the children, the motto of the activity was “Go Green”. The activity was held on 6th July 2016. The students were explained how the human activities in the modern world are a threat to the nature and eventually leading to its destruction.

The students of classes I and II drew a poster juxtaposing the green, lush trees, clear blue sky and a barren land. This juxtaposition helped the children to superficially see the difference between pretty and ugly leading to the realization of harsh reality, that our earth will soon be a barren land, if we do not take correct measures to save our planet earth.

The children enjoyed the activity as they drew and coloured the poster and also wrote a slogan “The earth does not belong to us, we belong to the earth”. The children understood the depth of this slogan that earth is a gift for us and we should not take it for granted. The students also shared their views and the important things they learn everyday in general conversation, lesson reading and informative videos about protecting the earth. The activity was a reinforcement of the various important points related to keeping our environment clean and saving our future, taught to the students in various forms. It is very important to instill the need of protecting our planet at a young age, as the future of the earth lies in their hands.

Collage Making

“Beat the Heat, with a nice Cool Treat.”

The hot and happening month of July started with a collage making competition for students of class-I on the theme - “BEAT THE HEAT”, held on 11th July '2016. The activity needed the

students to think along the lines of summer season and all things which can help in curbing the heat around them.

The students made cut outs of various items, as a part of collage making activity such as cool drinks, swimming, water parks, smoothies, salads, fruits, beach, sun glasses. The students were given an A4 size sheet and a glue to create a collage with help of the picture cuttings they had brought. Students also got decorative material to accentuate their collage, such as stars, bead stickers, embossed pictures, stickers, coloured tape for the borders, stars.

Students were eager and over-enthusiastic for the competition. They presented different and unique ideas. They created astonishing collages which put a smile on every faces.

The activity gave the students great ideas to curb the heat this summer season. It was one of the effective learning activities for the students' as they also learnt to share their things with others. The activity helped to create good interpersonal relationships to keep the classroom in high spirits and also understand value of team work.

ECONITY WEEK

The month of July focused on teaching children the importance of keeping our environment clean and green. Students of classes 1 and 2 celebrated 'Econity Week' in a special way. It lasted for a week from 18th to 22nd July 2016. The week was loaded with lots of fun activities. A step further was taken this week by not just teaching about the do's and don'ts but also having gratitude for people who help us stay in a clean environment. The importance of such jobs, which are considered menial but are rather very important, was explained to the children.

On the first day children made a badge and took pledge to protect their earth. On the badge the children wrote, “The Earth is in Our Hands”, realizing that saving earth is entirely our duty. On the second day, a power point presentation was shown to the children on “Ways to Save Waste Food”. The motive of this activity was to make the children realize the value of food. They were informed about the facts about the shortage of food in world. It made the children realise the importance of food and they pledged to avoid wastage and several ways of reusing the leftover food. This was followed by a card making activity. The children made very colourful cards for the house keeping department staff. It was a gesture to convey their appreciation to the didis and bhaiyas for keeping their classrooms clean. On the fourth day, the children handed over these cards to the house keeping department and personally conveyed their regards to them. The children were excited to hand over their cards to them and the house keeping department was overwhelmed by the sweet gesture of the students. **The Econity week** was concluded by a **poster making activity**. The students made poster on the essential three “R's” to save our planet, Reduce, Reuse and Recycle. Several ways to reduce the wastage, reuse of the products that can be done and promotion of recycling things was explained to the students.

The Econity week was a huge success as the students were seen following several things taught to them during the week.

FUNK WITH JUNK

'Funk With Junk' competition was organised for class 2 students on 29.7.2016. The competition was enjoyed by all the students where they participated to show their talent. It was a perfect ending for the month of July as the entire month was dedicated to teaching the importance of a clean, safe environment and saving our planet earth for a better world. The oath taken by students in the earlier activity “Reduce, Reuse and

Recycle” was put in action in the activity. The aim of the activity was to bring into action was being taught to them in their classes, and what better way than craft. What the students enjoyed letting their imagination go wild. The students were asked to bring waste material from home and make some beautiful craft out of them. Out of the waste material such as bangles, cardboard, old pencils, ice cream sticks, paper cups, old c.ds etc children made some useful material which could be used in their classrooms and home. They made beautiful things such as pencil stands, utility boxes, bookmarks, etc. The activity became more successful when the children took out their material and were eager to show their final work. The results were amazing. The students made wonderful crafts out of the waste material.

IMO WINNER

It was indeed a very proud moment for us when **Anant Tiwari of class 2, won a silver medal for International Math Olympiad**. We wish him luck for his future endeavors and hope he keeps making our school proud as he has done so
